Cultivation

From planting to storage

1 Seed preparation and planting

- Long dormancy: we recommend chitting or pre-sprouting the seed before planting.
- Emerges later, but then develops very quickly.

2 During the growing season

- Medium susceptibility to late blight on foliage; regular protection is recommended.
- Medium susceptibility to leaf roll virus; watch for aphids.

3 Haulm killing and harvest

- Low susceptibility to mechanical damage.
- Harvest once the skin has set.

4 Storage

- Thanks to the long dormancy it stores well.
- Store in the dark, cool and dry.
